At Clarus Partners, we are proud to provide robust business valuation and forensic accounting and litigation support. Our team of business valuation and forensic accountants assists clients or attorneys in the litigation process, evaluating and explaining complex financial situations in a clear and concise manner.

Our valuation and forensic accountants, attorneys, certified public accountants, and researchers play many roles. In one instance, we may help you determine the value of your business in planning for the future. In another instance, we might be a consulting expert who helps analyze a case, advise on its financial aspects, or be called as an expert witness to provide an opinion at trial. In the complex world of litigation, we are not only accountants, we are part investigator, part lawyer, part professor, and part communications professional—in order to bring clarity to complex business issues.
